

CELEBRATING THIS AMAZING WEATHER, NAMIBIA!

Here are 4 preventative tips during the rainy season to help you enjoy the rain without incurring water damage:

1 Check your roof for leaks or damage
Especially after heavy rain & hailstorms

2 Care for your rain gutters
Clear gutters of leaves, debris & remove blockages

3 Do regular maintenance on your home to avoid surprises
Small repairs regularly will avoid large damages

4 Ensure that all water channels & weeping holes are clear of debris/obstructions
Obstructions can cause water to dam up & flood into your home

5 Protect your assets during thunderstorms - Pull out plugs of essential items during a thunderstorm or replace your plugs with surge protectors
